

# microSD™ Card Connectors

## DM3 Series

### ■ Features

#### ◆ Common to the entire Series

##### 1. Extremely small in size

Small external dimensions and the above-the-board height make the connectors the smallest on the market.

##### 2. Reverse card insertion protection

Unique card slot design (patented) protects the connector from damage when the card is attempted to be inserted in reverse, allowing it to re-inserted correctly.

##### 3. Effective ground and shield configuration

4-connection points of the metal cover to the printed circuit board assures secure connection of the ground circuit and provides EMI protection.

##### 4. Rigid and strong construction

Despite its small size, high-strength materials used in the connectors produced a strong and rigid structure.

##### 5. Card detection switch

The card detection switch is Normally Open

#### ◆ DM3AT and DM3BT (Push - Push, with ejection mechanism)

##### • Card fall-out prevention

Built-in card tray and the unique push insertion-push ejection mechanism (patented) prevent accidental card ejection or fall-out.

Despite its small size the connectors will eject the card to a distance of 4.0mm, allowing easy hold and removal of the card.

##### • Exposed termination leads

Easy inspection and rework of the solder termination joints.

#### ◆ DM3CS (Hinge, Push-Pull, manual, without ejection mechanism)

##### • Simple and reliable card insertion

Hinged metal cover provides location and guides the card during the insertion / removal. Closing of the cover confirms the electrical and mechanical connection with a tactile click sensation.

##### • Reliable contact with the card contact pads

Unique contact design and card slide action will clean the contact areas of the card.

##### • Accessible termination areas

Contact solder terminations may be inspected and reworked.

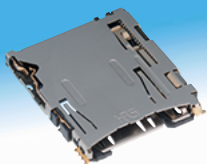

#### ◆ DM3D (Push -Pull, manual, without ejection mechanism)

##### • Partial card insertion hold

Card will not fall-out even when it is not fully inserted. Full insertion and electrical / mechanical connection is confirmed with a distinct tactile feel.

##### • Accessible termination areas

An inner lead system that can be reworked is used in this design. Contact solder terminations may be inspected and reworked.

Card insertion-ejection	Series	Image	Page
Push-Push	DM3AT		2~4
	DM3BT		5~6
Hinge-manual insertion/ejection	DM3CS		7~8
Push-Pull manual insertion/ejection	DM3D		9~10

## ■Product Specifications (DM3 Series)

Ratings	Current rating : 0.5A Voltage rating : 125V AC	Operating temperature range : -25°C to +85°C (Note 1) Storage temperature range : -40°C to +85°C (Note 2)	Operating humidity range : RH 95% max. (No condensation)
---------	---	--	---

Item	Specification	Conditions
1. Insulation resistance	1000MΩ min. (Initial value)	Measure at 500V DC
2. Withstanding voltage	No flashover or insulation breakdown	500 V AC / 1 minute
3. Contact resistance	100mΩ max. (Initial value)	1mA
4. Vibration	No electrical discontinuity of 100 ns or longer No damage, cracks or parts dislocation.	Frequency : 10 to 55Hz, single amplitude of 0.75mm, 3 directions for 2 hours
5. Humidity	Contact resistance : 40mΩ max. (change from initial value) Insulation resistance : 100MΩ min. No damage, cracks or parts dislocation.	96 hours at of 40 ± 2°C, and humidity of 90 to 95%
6. Temperature cycle	Contact resistance : 40mΩ max. (change from initial value) Insulation resistance : 100MΩ min. No damage, cracks or parts dislocation.	-55°C → 5 to 35°C → 85°C → 5 to 35°C Times : 30 min. → 5 min. → 30 min. → 5 min. 5 cycles
7. Durability	Contact resistance : 40mΩ max. (change from initial value)	10,000 cycles, 400 to 600 cycles per hour (DM3AT, DM3B) 5,000 cycles, 400 to 600 cycles per hour (DM3C, DM3D)
8. Resistance to soldering heat	No deformation of components affecting performance.	Reflow : At the recommended temperature profile Manual soldering : 350°C for 3 seconds

Note 1 : Includes temperature rise caused by current flow.

Note 2 : The term "storage" refers to products stored for long period prior to mounting and use.

## ■Materials / Finish

### DM3AT, DM3BT

Part	Material	Finish	Remarks
Insulator	LCP	Color : Black	UL94V-0
Contacts	Copper alloy	Contact area : Gold plated Lead area : Gold plated	_____
Guide cover	Stainless steel (DM3AT) Copper alloy (DM3BT)	Lead area : Gold plated	_____
Other components	Stainless steel (DM3AT, DM3BT) Piano wire (DM3BT)	_____ Nickel plated	_____

### DM3CS, DM3D

Part	Material	Finish	Remarks
Insulator	LCP	Color : Black	UL94V-0
Contacts	Copper alloy	Contact area : Gold plated Lead area : Gold plated	_____
Guide cover	Stainless steel	_____ (DM3CS) Tin plated (DM3D)	_____

## ■Product Number Structure

Refer to the chart below when determining the product specifications from the product number.

Please select from the product numbers listed in this catalog when placing orders.

**DM3 AT – SF – PEJM5**

①

②

③

④

① Series name : DM3	③ Termination type : SF Right-angle SMT(Standard) DSF Right-angle SMT(Reverse)
② Connector type : AT Push-Push (ejection mechanism), Top board mounting (Standard) BT Push-Push (ejection mechanism), Bottom board mounting (Reverse) CS Hinge, Push-Pull (no ejection mechanism), Top board mounting (Standard) D Push-Pull (no ejection mechanism), Top board mounting (Standard) Number of contacts : 8	④ Card ejection code : PEJM5, PEJS (Push insert/push eject) None : Manual card insertion/ejection

## A 3D perspective view of a grey, rectangular electronic component, likely a sensor or actuator. The component has a central slot and several electrical connectors and pins visible on its sides and bottom. The background is a blue gradient.

The drawing illustrates the mechanical specifications of the HS-MSD01 module. The top view shows a rectangular footprint with a width of 13.85 mm and a height of 15.95 mm. The pin headers are labeled: #1(DAT2), #2(CD/DAT3), #3(CMD), #4(VDD), #5(CLK), #6(VSS), #7(DAT0), and #8(DAT1). The side view shows a thickness of 1.68 mm. The bottom view shows a microSD card slot with a width of 11 mm and a height of 15.95 mm. The card detection switch (A) is located at the bottom left, and the card detection switch (B) is located at the top left. The card eject position is marked at 21.55 mm from the bottom left corner. The card lock position is marked at 17.55 mm from the bottom left corner, and the card over stroke position is marked at 16.75 mm from the bottom left corner. The card is labeled 'microSD CARD' and 'HS'. The dimensions are given in mm.

Dimensions (mm):

- Top View: 13.85 (width), 15.95 (height), 7.35 (pin header width), 3.2 (pin pitch), 1.68 (thickness), 1.68 (card slot width), 0.8 (card slot depth).
- Side View: 15.95 (height), 16.75 (CARD OVER STROKE POSITION), 17.55 (CARD LOCK POSITION), 21.55 (CARD EJECT POSITION).
- Bottom View: 11 (width), 15.95 (height), 5.5 (card slot width), 2.9 ± 0.15 (card slot depth).

Labels:

- #1(DAT2), #2(CD/DAT3), #3(CMD), #4(VDD), #5(CLK), #6(VSS), #7(DAT0), #8(DAT1)
- CARD DETECTION SWITCH(B)
- CARD DETECTION SWITCH(A)
- microSD CARD
- HS
- CARD OVER STROKE POSITION
- CARD LOCK POSITION
- CARD EJECT POSITION

All dimensions : mm

[illegible]

All dimensions : mm

● Embossed carrier tape dimensions (1,500 pcs/reel)

Technical drawing of a circular mechanical part. The front view (left) shows a circular cross-section with a central dashed circle and six radial slots. The side view (right) shows the part's profile with a total width of 32.4, an outer diameter of  $\phi 380$ , and an inner diameter of  $\phi 80$ .

Technical drawing of the SD card interface showing top, side, and bottom views with dimensions and pin labels.

**Pin Labels:**

- #4(VDD)
- #5(CLK)
- #6(VSS)
- #7(DAT0)
- #8(DAT1)
- #1(DAT2)
- #2(CD/DAT3)
- #3(CMD)

**Dimensions (mm):**

- Top view: 13.85, (3.2), (6.5), 2.9±0.15
- Side view (left): 2.38MAX, 1.83, (0.55), (21.55); CARD EJECT POSITION, (17.55); CARD LOCK POSITION, (16.75); CARD OVER STROKE POSITION, 16.05, 15.95, (15)
- Side view (right): 2.7MAX, 6.7MAX, 15.1, 15.45
- Bottom view: (11), (5.5), 1

**Other Labels:**

- CARD DETECTION SWITCH(B)
- CARD DETECTION SWITCH(A)
- microSD CARD
- HS
- 2, 3, 1, 2 (feature callouts)

All dimensions : mm

[illegible]

2

4  No conductive traces.

HRS 5

◆Packaging Specifications

- Embossed carrier tape dimensions (1,200 pcs/reel)

All dimensions : mm

- Reel Dimensions

## DM3CS, Hinge, Push -Pull (no ejection mechanism), Top board mounting (Standard)

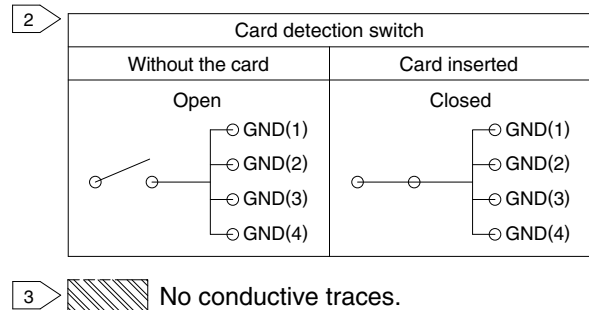

Part No.	HRS No.
DM3CS-SF	609-0032-3

## Recommended PCB mounting pattern

Note 1  $\phi$  indicates the center line of the microSD card slot.

All dimensions : mm

◆Packaging Specifications

- Embossed carrier tape dimensions (1,300 pcs/reel)

- Reel Dimensions

The drawing illustrates the mechanical specifications of the HRS card reader. It includes three views: a top view, a side view, and a front view of the connector pins.

**Top View Dimensions:**

- Overall width: 11.95
- Distance from left edge to Card Detection Switch (B): 1.55
- Distance from right edge to Card Detection Switch (A): 1.55
- Distance between switches: 6
- Distance from left edge to the start of the card slot: 11.45
- Distance from the start of the card slot to the end of the card slot: 9.65
- Distance from the end of the card slot to the right edge: 11.45
- Distance from the left edge to the center of the card slot: (15.8)
- Distance from the center of the card slot to the right edge: (15)
- Distance from the left edge to the center of the card slot: (0.7)
- Distance from the center of the card slot to the right edge: (0.7)
- Distance from the center of the card slot to the right edge: (4.5)
- Distance from the center of the card slot to the right edge: (5.5)
- Distance from the center of the card slot to the right edge: (11)

**Side View Dimensions:**

- Overall height: 3.35
- Distance from top edge to the start of the card slot: 1
- Distance from the start of the card slot to the end of the card slot: 2.7
- Distance from the end of the card slot to the bottom edge: 0.9

**Front View Pinout:**

- # 8 (DAT1)
- # 7 (DAT0)
- # 6 (VSS)
- # 5 (CLK)
- # 1 (DAT2)
- # 2 (CD/DAT3)
- # 3 (CMD)
- # 4 (VDD)

## ◆ Recommended temperature profile

### HRS test condition

Solder method : Reflow, IR/hot air  
 Environment : Room air  
 Solder composition : Paste, 96.5%Sn/3.0%Ag/0.5%Cu  
 (Senju Metal Industry, Co., Ltd.'s  
 Part Number:M705-GRN360-K2-V)  
 Test board : Glass epoxy 60mm×100mm×1.0mm thick  
 Metal mask : 0.12mm thick  
 Number of reflow cycles : 2cycles max.

The temperature profiles shown are based on the above conditions.

In individual applications the actual temperature may vary, depending on solder paste type, volume / thickness and board size / thickness. Consult your solder paste and equipment manufacturer for specific recommendations.

## ◆ Precautions

1. Do not immerse or clean the entire connector with cleaning solutions as this may affect proper operation of the ejection mechanism and electrical performance of the connector
2. Do not apply excessive force to the connector when handling or after installation on the PC board.
3. The connectors will reliably connect and operate with the correctly inserted microSD™ cards.  
 Follow the correct insertion / ejection procedure for the specific connector in use.  
 Attempts of incorrect insertion of the card may cause damage to the connector or the card.
4. The connector must be correctly mounted on the PC board before the card can be inserted. Do not insert the card in the un-mounted connector.
5. Mounting on the Flexible Printed Circuit (FPC)  
 To assure correct performance it is recommended that a flat reinforcement plate 0.3 mm min. thick be used under the FPC.
6. Small visible residual manufacturing fluids or tooling marks do not affect connector's performance.
7. Repeated insertions and removal of the cards may leave some marks on the card itself. This will have no affect on the connector performance.

### ● Refer to applicable Operation Manual listed below for additional precautions.

Series	Operation Manual Number
DM3AT Series	ETAD-F0345
DM3BT Series	ETAD-F0324
DM3CS Series	ETAD-F0335
DM3D Series	ETAD-F0353
